**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 12 is rejected under 35 U.S.C. 101 because it is directed to non-statutory subject matter. It is to be noted that the digital data recorded on the recording medium is not structurally and functionally interrelated to the medium but is merely carried by the medium. Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory).

3. Claims 1-11, and 13-16 contain allowable subject matter over the prior art of record.

4. The following is a statement of reasons for the indication of allowable subject matter:

5. The claimed invention is directed to a recording apparatus for recording digital data to a recording medium. The independent claims identify the feature of "recording on recording medium data having the file structure that allows a first file format composed of a reference information storing portion and a real data storing portion and a second file format composed of only a reference information storing portion, wherein the reference file information and medium identification information of the record

medium or information of which the medium identification information has been converted are recorded to at least the reference information storing portion of a file having the second file format". The closest prior art, Vitkus et al is directed to a conventional system and method for implementing open and closed file system on a storage medium, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Modeste et al discloses a method and apparatus for user controlled modulation and mixing of digitally stored compressed data.

Morioka et al discloses a recording/reproducing apparatus for recording and reproducing hybrid data including text data.

Vitkus et al discloses a system and method for implementing open and closed file system on a storage medium.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 703-305-4780. The examiner can normally be reached on MM-F (9:00-6:30), second Monday off.
